Do you always fill out forms when you go to the doctor?

*...even though **you swear you filled out these same forms** the last time you went?*

Is it challenging to remember <u>all</u> of your family history?

...especially any health conditions of your
grandparents or parents*?*

3

Do you ever forget to bring your insurance card with you to a new facility?

*...have you accidentally brought your **dental insurance card to your eye appointment**?*

Do you wish your health providers could share information to reduce the number of forms you have to fill?

...well they can't..

But you can,
using ChartNotes!

ChartNotes

ChartNotes primarily focuses on the ability to share your medical chart information with your healthcare provider.

- Forms
- Family
- Insurance
- Share

Forms

Fill out forms once!

Store your forms for easy changes at any time.

Remember all your medical history (including immunizations or surgeries!

Family

Connect with your family to easily fill out your family history form!

You cannot see their forms and **they cannot see your forms**. Only relevant information will automatically answer your forms.

You can always add information to your family form as well.
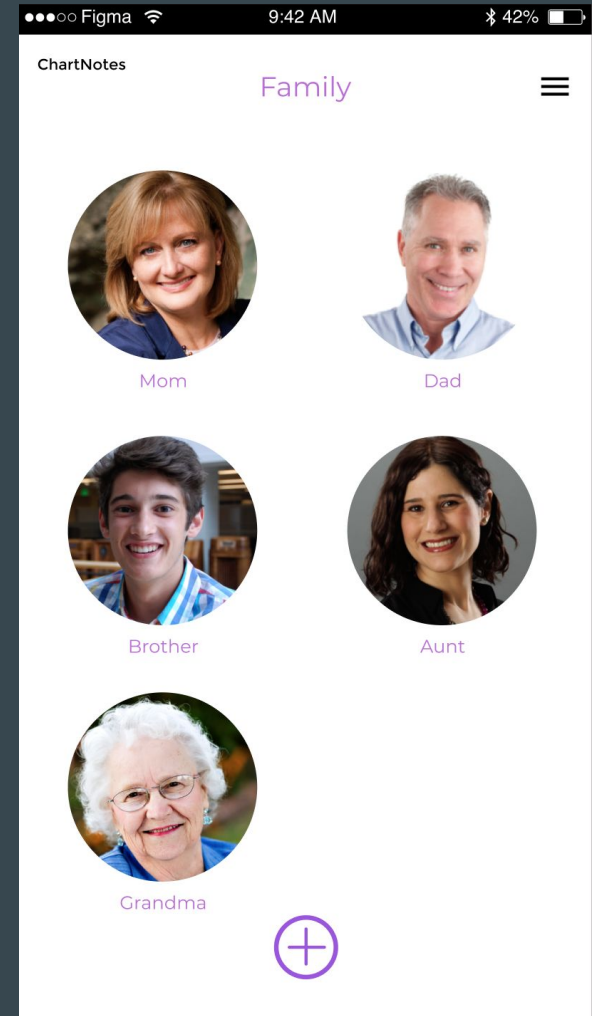

Insurance

Add all your insurance cards!

- Swipe left and right to see the back
- Label any insurance cards you have
  - Primary, Eye, Dental...etc
- Update insurance cards annually

*You'll never forget an insurance card again!*

10

Share

Share your information securely!

Each time you go to the Share screen, **new temporary codes (QR and numerical) are generated** for secure transfer of your information.

The app maps who (facility) is allowed to collect what information (relevant forms) to ensure privacy of your medical information.

Demo of the Prototype

Link to prototype - Here

Future

- Create a better landing page
- Create a tutorial for first time users
- Provide smart insurance information

- Add the Health Facility as a user
- Request Appointment
- Pre and Post tasks.

Thank You!

Do you have any questions or feedback?
